25X1

1. The following particulars have been obtained on the permanent telephone lines leading out of the Public Security Office in Sulechow. (Zuellichau-053/W41).
  - a. A four-core line in the direction of Swiebodzin (Schwiebus-053/W33) has been finished but has not as yet been connected with the UB (Security Police) headquarters exchange inside the UB building in Sulechow. It has not been established where this line leads. It must be connected with some exchange, since on two occasions an army patrol was observed talking with this unidentified exchange by means of a portable field apparatus.
  - b. A six-core line in the direction of Zielona Gora (Gruenberg) has been partly completed. Two cores were connected on 30 September with the exchange inside the UB building in Sulechow; on the other end the cores are joined to the poles of the Moscow-Berlin telephone line. The other four cores stretch only for about 25 telephone poles outside the UB building.
2. Further work has been temporarily suspended. A soldier in the group engaged in the construction of this line said that work had been interrupted due to the lack of cores.
